

Internet of Things (IoT) - Assignment Questions

1. Define Internet of Things (IoT). Explain its importance in modern technology.
2. Describe the architecture of IoT with its different layers.
3. What are sensors and actuators? Explain their role in IoT systems.
4. Explain the working of IoT with a real-life example.
5. What is MQTT protocol? Discuss its features and advantages.
6. Differentiate between HTTP and MQTT protocols.
7. Explain the concept of smart cities using IoT.
8. What are the challenges and limitations of IoT?
9. Describe various applications of IoT in healthcare.
10. Explain the role of cloud computing in IoT.
11. What is IoT security? Discuss common threats and solutions.
12. Explain the concept of edge computing in IoT.
13. Describe different communication technologies used in IoT.
14. What is the role of data analytics in IoT?
15. Explain the future scope and trends of IoT.
